

## Retraction Notice

### Citation:

**“Sustainable Development in Dye Waste Management: A Comparative Study on the Effectiveness of Adsorption and  $\gamma$ -Radiolysis”** by *Anupama Prabhala, Naina Raje, Sanjay Sethi, Sangita Pal, and Beena G. Singh*, published in *J. ISAS: Vol. 2, Issue 4 (2024), pp. 1–22*, DOI: **10.59143/isas.jisas.2.4.KZBG4323**,

The above article has been **retracted** with the approval of the Editorial Board of *J. ISAS*.

### Reason for Retraction:

After publication, the authors requested major revisions, including modifications to an equation and its corresponding values, removal of a figure, and alteration of another figure’s Y-axis. These proposed changes would substantially affect the paper’s scientific content, interpretation, and conclusions.

As per Editorial policy of the J. ISAS, only minor changes /corrections that do not alter data/results, its interpretation/conclusions of a published article may be permitted as Corrigendum/Erratum. Since authors have requested for Major changes in the Equation, Figures and Tabular data, Editorial board has decided **RETRACT THE ARTICLE** to maintain the accuracy, transparency and integrity of the scientific record.
